

Lanzo Arbo Rack I

Attention! You'll find our Arbo Rack II in the Premium Rack section!

To offer you even more quality for the same price we've decided to upgrade our much-loved Arbo Rack to Premium category and produce it using the new, very good insulating panel material "TP". This rack system with a width of about 100 cm and a depth of about 21 cm was particularly made for the BraPlast container of the size 18,5 x 18,5 x 19 cm. It's format makes it the ideal box for rearing for example tree-dwelling snakes like *Morelia spilota*, *Morelia viridis* or *Corallus caninus*.

The modules can be stacked meaning you can accommodate max. 50 young animals on just one metre wall space!

We also offer the BraPlast boxes size 18,5 x 18,5 x 19 cm. The boxes come unpunched meaning you have to apply vent holes for yourself or rely on our service. We offer to punch holes for you, see below. The boxes exactly fit into the compartments leaving a gap of only 2 mm. The rack is heated with specially developed heat tapes, a panel heating which ensures a steady and partial warming of the boxes.

Now brand-new: Our T stick, which easily and securely fits into the BraPlast boxes providing an optimal climbing device for the snakes. Welded tightly, and ends sealed

Arbo Rack I with 5 layers/25 compartments/height 100 cm 365.00 € heattapes included
Arbo Rack I with 3 layers/15 compartments/height 60 cm 265.00 € heattapes included
Upon request racks with two or four layers are possible.
