

## Incubators

### LanzoTherm 3000

Presenting the LanzoTherm 3000 we offer you a professional cabin incubator for reptiles with bleeding edge technology:

- modern, extremely good insulating thermo cabin
- set point temperature adjustable exactly and easily
- continuous display of actual temperature value
- high-tech pulse technology controlling the operating level
- large, easy to read LCD display
- interior lighting
- air circulation fan which presses air smoothly bottom-up through the incubator, not vice versa!
- tight gull-wing door with thermal insulation glass
- interior breeding chamber fits exactly three pieces of the Gies plastic box with 28 cm diameter and 16 cm height

Particularly this last point gives the LanzoTherm 3000 the decisive advantage! The circular Gies boxes perfectly fit even larger clutches because they provide sufficient surface and height! Three of them fit into the incubator one above the other.

The grid guidance provides secure stand for the breeding boxes and optimal distance between them for sufficient air circulation.

This Gies box with 28 cm diameter and 16 cm height is the optimum breeding box even for larger clutches.

Exterior dimensions: width 50 cm, depth 60 cm, height 102 cm

Interior dimensions: width 37 cm, depth 47 cm, height 70 cm

Price: 1,099.00 euros

### Lanzo Incubator 500

Such as other products we set standards with this new incubator. The case is made from smooth plastic inside and outside which can be cleaned and disinfected easily. Unlike many styrofoam boxes that are offered as incubators the Lanzo Incubator 500 can be actually re-used after thorough disinfection.

The carcass consists of a lower and an upper part including two large observation windows. The walls are foamed for optimal thermo insulation.

For temperature control a pulse proportional thermostat is mounted in the top section. It ensures exact adjustment of the temperature!

Dimensions: 50 x 50 x 23 cm

Price: 189,00 €

All prices include 19% VAT, packing and shipping costs extra.
